## SUMMER INTERNSHIP WITH RESILITY

NORDIC COMPASS—YOUR KEY TO NAVIGATING CORPORATE COMPETITIVE ADVANTAGE

### INTRODUCTION

Resility AB is a Stockholm-based company that focuses on sustainability consulting and corporate environmental, social, and governance (ESG) research. Resility works with financial firms, corporations, academic institutions, and NGOs on developing sustainability platforms, and advancing ESG data disclosure and integration into corporate analysis.

### NORDIC COMPASS

The Nordic Compass research tool offers our analysis on the medium- and long-term value creation potential of publicly-traded Nordic companies. It employs our proprietary framework developed to identify opportunities and risks, to assess the sustainable business performance capabilities of each company.

Nordic Compass produces several products based on Resility's ESG research. Each report assesses a single company from the perspective of what value drivers are most relevant to the sustainable business performance of that company and how successful the company is in its management of ESG-related factors. Each report provides key financial and sustainability metrics, derived from approximately 100 data points, as well as a company summary and a detailed description of material focus areas.

*For the fourth consecutive year, the Resility Summer Internship is hosted at the Swedish House of Finance (SHoF) at the Stockholm School of Economics in central Stockholm.*

### THE 2019 SUMMER INTERNSHIP

Resility is seeking several highly-qualified and dedicated graduate students to intern for seven weeks, starting on July 1st and ending on August 16th, specifically working on the Nordic Compass research tool. Interns will receive a salary and could be considered for a full-time research position at the Swedish House of Finance.

Students will have the opportunity to work with an extraordinary leadership team that is dedicated to producing top-quality, unparalleled research. The executive team has been educated at Harvard and KTH, and holds significant professional experience from top firms including Goldman Sachs.

### PROJECTS AND TASKS

Interns will research a pre-selected set of publicly-traded Nordic companies and complete a data collection effort focused on ESG metrics. Data collection will be performed based on an established set of rules and guidelines, set forth in the collection manual and data definitions provided by Resility. Interns will work under the guidance of an experienced Resility summer intern alumnus.

Each intern will be expected to complete data collection for approximately 80 assigned companies. Intern work will be supported by the leadership of Resility.

### LOCATION AND LEADERSHIP

The internship is a full-time commitment held in Stockholm in collaboration with the Swedish House of Finance. Resility Internship Managers Mr. Zihao Liu and Ms. Chunyang Han are leading the data collection efforts. Anders Anderson, Executive Director of SHoF, will supervise the internship.

### NORDIC RANKING ESG Management Performance

NORDICRANKING.COM RANKS ESG MANAGEMENT PERFORMANCE OF PUBLICLY TRADED NORDIC COMPANIES

The ESG data in Nordic Compass is used in the evaluation of ESG management performance on NordicRanking.com. NordicRanking.com aims to accelerate integration of ESG factors in investment analyses, to drive transparency in corporate disclosures, and to raise awareness amongst consumers to inform their individual investment decisions. The ESG data in Nordic Compass makes that possible.
